

Managing secure access to patient rooms, medication storage, admin offices, and restricted care areas across healthcare facilities.

THE CHALLENGES

• Patient Safety:

Prevent unauthorized access to patient areas and medication storage to ensure safety and privacy

• Access Control Complexity:

Constant movement of staff, visitors, and vendors demands reliable, flexible credential management

• Operational Inefficiency:

Manual key control slows response times and increases administrative workload

• Emergency Response:

Critical areas need immediate, secure access during medical or security events

• Staff Turnover:

Frequent credential updates for rotating staff and contractors create extra management time

• Compliance Demands:

Maintaining HIPAA, ADA, and life-safety compliance adds ongoing administrative pressure

Healthcare

Streamline Facility Safety with Smart, Affordable Access Solutions

SOLUTION-BASED FEATURES

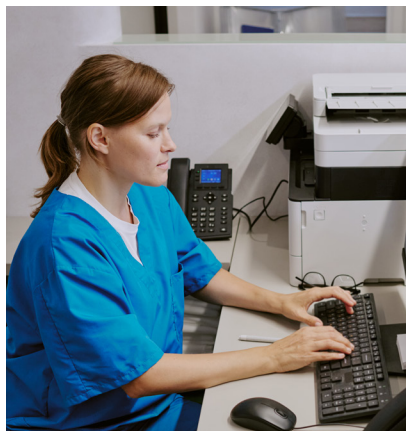

Controlled Access in Constant Motion

- Role-based access control for clinicians, staff, and vendors
- Hands-free RFID, keypad, or mobile entry supports sterile workflows
- Auto-locking secures restricted areas after each use
- Temporary access control for visiting contractors or rotating staff

Seamless Security for Sensitive Spaces

- Protect high-risk zones like patient rooms, labs, and medication storage
- Real-time alerts for forced entry or propped door events
- Audit trail reporting supports HIPAA and life-safety compliance
- Lock patient care areas automatically after visiting hours
- Rapid lockdown in response to emergency situations

Efficient Oversight and Centralized Management

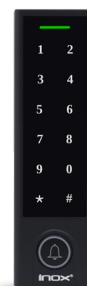

- Unify access control on one platform across all locks, wings, and facilities
- Cloud-based dashboard for real-time monitoring and user management
- Scalable system for clinics, hospitals, and multi-site networks
- Battery-powered retrofits reduce installation and maintenance costs
